## java.io.IOException: Could not locate executable null\bin\winutils.exe in the Hadoop binaries

2015-06-11 16:08:26 作者: 芒果酷 来源: 芒果酷

```
在已经搭建好的集群环境Centos6.6+Hadoop2.7+Hbase0.98+Spark1.3.1下,在Win7系统Intellij开发工具中调试Spark读取Hbase。运行直接报错:
             | 15/06/11 15:35:50 ERROR Shell: Failed to locate the winutils binary in the hadoop binary path java.io.10Exception: Could not locate executable null\bin\winutils.exe in the Hadoop binaries. at org. apache. hadoop.util. Shell. getQualifiedBinPath(Shell.java:356) at org. apache. hadoop.util. Shell. getWinUtilsPath(Shell.java:371) at org. apache. hadoop.util. Shell. getWinUtilsPath(Shell.java:371) at org. apache. hadoop.util. Shell. getWinUtilsPath(Shell.java:371) at org. apache. hadoop. security. SparkEnv&. createDiverEnv&SparkEnv&. scala:2201 at org. apache. spark. SparkContext. createSparkEnv&SparkEnv&. scala:269) at org. apache. spark. SparkContext. cinit (SparkContext. scala:272) at org. apache. spark. SparkContext. cinit (SparkContext. scala:154) at SparkFromHosee. main 
   查看hadoop源码发现里有这么一段:
public static final String getQualifiedBinPath(String executable)
throws loException
String fullExeName = HADOOP_HOME DIR + File. separator + "bin"
+ File. separator + executable;
File exeFile = new File fullExeName);
if (!exeFile = new File fullExeName);
throw new loException("Could not, locate executable " + fullExeName
} return exeFile. getCanonicalPath();
}

private static String HADOOP_HOME DIR = checkHadoopHome();
private static String checkHadoopHome() {

// first check the Dflag hadoop. home. dir with JVM_scope
String home = System. getProperty (hadoop. home. dir");

// fall back to the system/user-global env variable
if (home == null) {
    home = System. getenv("HADOOP_HOME");
    home = System. getenv("HADOOP_HOME");
}

// ### REPROOP_HOME的问题。如果HADOOP_HOME为空,必然fullExeName为null\bin\winutils.exe。解决方法很简单,配置环境变量,不想重启电

**Morthly 在程度图和 L **

**Morthly 在程度图和 L **

**Private static String home = System. getenv("HADOOP_HOME");
    home 
   ?
   脑可以在程序里加上:
   1System.setProperty("hadoop.home.dir", "E:\\Program Files\\hadoop-2.7.0");注:E:\\Program Files\\hadoop-2.7.0");
   稍后再执行,你可能还是会出现同样的错误,这个时候你可能会要怪我了。其实一开始我是拒绝的,因为你进入你的hadoop-x.x.x/bin目录下看,你会发现你压根
   就没有winutils.exe这个东东。
   于是我告诉你,你可以去github下载一个,地球人都知道的地址发你一个。
   地址: https://github.com/srccodes/hadoop-common-2.2.0-bin
   不要顾虑它的版本,不用怕,因为我用的最新的hadoop-2.7.0都没问题!下载好后,把winutils.exe加入你的hadoop-x.x.x/bin下。
   至此问题解决了,如果还没解决,那你是奇葩哥了,可以加我的QQ!
